DETAILED ACTION

Upon reconsideration and review of the Applicant's claims, all the previous Office action has been withdrawn and the following restriction requirement has been made. Any inconvenience to Applicant is regretted.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 and 30-36, drawn to a grating-coupled waveguide sensor and the method of it, classified in class 385, subclass 12.
- II. Claims 7-29, drawn to an optical interrogation system and the method of it, classified in class 356, subclass 330+.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group I has separate utility such as an optical waveguide sensor without having the claimed optical interrogation system. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2874

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
